

LED LENSER® P5
 Energy artist for performance-oriented people

Advanced Focus System

LED	High End Power LED
Length	115 mm
Weight	84 g
Luminous	105 lm*
Battery	1 x AA 1,5 V
Energy tank	4,2 Wh
Burning life	3 h**
Beam distance	130 m*

2009 ■

The LED LENSER® P5 is small, lightweight, an energy-saving marvel and at the same time a giant of brightness. It is operated with only one Mignon (AA) battery. Each nanosecond, the built-in DC/DC converter pumps energy through the high-performance LED. The lamp's patented*** focusing system (Advanced Focus System) is as convincing as its one-hand operation mechanism (Speed Focus).

Included in delivery: battery, supporting loop, pouch

Item No. 8405
Blister No. 8605

* Luminous flux (lumens) resp. max. beam distance (meters) in the brightest function when switching on with new set of fresh alkaline batteries. Average values, may vary ± 15% depending on type of chip and batteries.
 ** Average hours of burning life as measured until residual luminous flux amounts to 1 lumen.
 *** EP Patent 1880139; US Patent 11 / 662, 309
